WHO AM I?

I am a software engineer with a lot of experience in framework development for test automation. After working in an all open source team, I have found my love for it. Sharing and improving work together makes coding fun. I love to learn new things all the time. Recently, I started to get interested in Machine Learning and its uses. In general, I always try to stay positive in life and push my own knowledge.

- Ruby
- JavaScript
- Git
- Selenium
- Linux
- Machine Learning

EXPERIENCE

2019 – 2022

Software Engineer in Test — GitLab Inc.

I was working as a software engineer in test for GitLab. My team and I were developing a framework using Selenium and Capybara for easier test implementation and execution.

`Ruby / Selenium / Pact.io`

2018 – 2019

Software Engineer, Test Automation — Shpock GmbH

I was responsible for implementing a new framework for mobile automated testing. Since the product was mainly used from the app, this was vital for the company.

`Node.js / Appium / WebdriverIO`

2017 – 2018

Test Automation Engineer — Anecon GmbH

This was my introduction to test automation as a concept. I worked on multiple sites. Due to this, I witnessed a plethora of different projects and automation designs.

`C# / Selenium / SAP`

EDUCATION

2016 – 2018

Master's Degree — University of Applied Sciences, Technikum Wien

I have a masters degree in software development. During my studies I worked on many small and medium sized projects. My master thesis was about quality automation.

2017

ISTQB Foundation Level — Austrian Testing Board

During my first employment in the field of test automation, I got the opportunity to pass my ISTQB certificate. This is a fundamental software testing certificate.

2011 – 2016

Bachelor's Degree — University of Vienna

My bachelor studies were in the field of health informatics like imaging technologies. My thesis was in the field of medical data collection systems.

LANGUAGES

German - native
Croatian - native
English - proficient

HOBBIES

I love working with wood and improving my own home with it. Also taking pictures of all the things.

NON PROFIT

My family and I try to help kids in need. Due to war, a lot of children are alone in a new country.
